AQUA RITE PRO

Aqua Rite Pro and our new total pool chemistry system provide complete pool and spa sanitation using ordinary salt. It's extremely safe electrolytic technology uses a low-voltage electrical charge to convert a small amount of salt - approximately one teaspoon per gallon of pool water - into a virtually endless supply of fresh, pure chlorine. This environmentally friendly and self-renewing process produces up to 1.45 pounds of chlorine a day, enough to keep the water in a 40,000-gallon* pool clean, clear and luxuriously soft. And since the salt doesn't wear out or evaporate, you rarely have to add more, making Aqua Rite Pro as cost-effective as it is convenient. The industry's first integrated Total Pool Chemistry™ and chlorination system lets pool owners work less and play more. It automatically senses chlorine and pH levels then dispenses a self-renewing supply of fresh, pure chlorine while controlling pH. For pools with the most consistent water quality possible, water that's brilliant, soft and silky-smooth.
