THE #1 SELLER FOR OVER 50 YEARS

Introducing the New Lite2 Heater with Jandy Technology Inside!

Lite2 Heaters

With over 50 years of experience as the #1 selling brand of pool heaters—there is a Jandy heater designed for every application. Reliability and performance year after year, season after season—whichever model you select is sure to provide years of dependable service.

A Variety of Models to Choose From . . .

THE ULTIMATE IN FEATURES

The new LJ model features a liquid crystal digital display with programmable pump control, dual temperature controls, built-in freeze protection and heater diagnostics.

THE ULTIMATE IN CONVENIENCE

The LJ & LD models have self-cleaning, hot surface ignition systems providing quick start every time. Ceramic fiber combustion chamber makes for lightweight, compact design. Durable power coat finish provides years of performance.

LG models are millivolt ignition systems.

All models are available for either natural gas or propane fuels.

EFFICIENT DESIGN SAVES YOU MONEY

The Lite2's copper heat exchanger and Flow-Thru™ baffles allow for efficient heat transfer, lowering operating costs and extending the swimming season!

SIZING CHART FOR POOL HEATER

Model No.	125	175	250	325	400					
Temp. Diff.	Maximum Pool Surface Area (Sq. Ft.)									
15°F	667	889	933	1244	1333	1778	1733	2311	2133	2844
20°F	500	667	700	933	1000	1333	1300	1733	1600	2133
25°F	400	533	560	747	800	1067	1040	1387	1280	1707
30°F	333	444	467	622	667	889	867	1156	1067	1422
35°F	286	381	400	533	571	762	743	990	914	1219

1. Sizing Chart is based on 3½ mph average wind and average pool depth of 5.5 feet. Shading on chart indicates sizing at 0 (zero) mph wind.

LAARS HI-H2 HEATERS

LAARS HI-E2 HEATERS EFFICIENCY EQUALS SAVINGS

Exceptionally low operating costs — experience the savings offered by the industry's most advanced and fuel efficient heater. "The best heater money can buy."

95% efficiency lowers your heating costs, extends your swimming season and often pays for itself in just two years! And it delivers 3 times the heating capacity of a standard heat pump. High tech composite materials and quality construction is why the Hi-E2 exceeds average heater life expectancy. Installation costs are also reduced with direct PVC pipe connection capability. Multiple units can be easily stacked for larger facilities, making the modular Hi-E2 ideal for both residential and commercial applications.

#EHE-350—HI-E2
 350,000 BTU ASME Commercial Heater . . \$8,727.00

- 95% efficient, making it the most efficient heater available.
- Certified by AGA, CGA and ASME for commercial use.
- Direct vent with PVC pipe.
- Sealed combustion chamber and automatic power venting (eliminates down drafting).
- Exceeds AQMD (Air Quality Management District) environmental standards. NOx emissions are the lowest in the industry.

LAARS LX HEATERS

LAARS LX HEATERS

Introducing the first pool/spa heater so advanced it's simple. Technology. Reliability. Our exclusive digital controls provide more precision and less hassle. And inside the incredibly reliable LX/LT heaters you'll find plenty of features to warm up to: Both the LX and LT models include automation-ready features to provide convenient pool-to-spa switching. The LX control and user-friendly graphical interface is a key element in your RS™ controlled pool/spa environment. The LT has a simplified dual electronic thermostat.

#LX250N—LAARS LX 250
 250,000 BTU N.G. Heater . . . \$2,721.00

#LX250P—LAARS LX 250
 250,000 BTU Propane Heater . . \$2,721.00

#LX400N—LAARS LX 400
 400,000 BTU N.G. Heater . . . \$3,290.00

- Fan assisted controlled combustion for consistent efficiency — 83%.
- Corrosion resistant polymer headers for improved circulation.
- Contemporary design to blend into any backyard landscape.
- Low NOx, meets all clean air standards.
- Capable of automating Pool/Spa.
